

Product Data Sheet

26.01.2022

Product name	HATAG FRF (Fouling release film)
Film typ	Multilayer, biocide free, self-adhesive fouling release film
Surface	Fouling release silicone, black, protected with blue PE film
Colour	Black
Adhesive thickness	0,070 mm
PVC thickness	0,070 mm
Primer thickness	0,055 mm
Fouling release thickness	0,110 mm
Protection film thickness	0,050 mm

1.1	Core	Paper or Plastic, 67-152 mm, inside diameter
1.2	Width	500-700 mm
1.3	Core width	According to production width
1.4	Roll length	5 m – 60 m
1.5	Winding	Surface outside, adhesive side inside
1.6	Transport	In single boxes or collective box
1.7	Packaging	Boxes according to the product dimension
1.8	Labelinglager	Labels on the box
1.9	Storage	At least 2 years (out of direct sunlight and moisture)
2.0	Adhesion	After 24 h at least 10 N/2,5 cm, according to Finat 1
2.1	Antifouling	Static free of growth for up to 30 days; dynamic fouling protection for up to 5 years. Tested according to ASTM 6990-03 and ASTM 3623-78A

The film does not contain any biocides, toxins or any other dangerous or prohibited ingredients.

However, it is not always possible to rule out minor contamination of the raw material or film, and this can lead to films containing such substances at trace level. The analysis of such substances is not necessarily part of our quality control system. We provide this product information on the basis of our current knowledge and experience and can neither give a guarantee nor accept responsibility for factors that are beyond our control or knowledge.
